

Head of Water and Physiology

About us

Having created the world's first smart water system inspired by the natural water cycle, we are driven to reinvent the way water is consumed globally. Our solution allows users to create personalized mineral water at home, giving them control over their drinking water while minimizing plastic wastage. Our international team consists of members from over fifteen countries across five continents, combining engineering, business, marketing, and UX expertise.

Our technology

Our process works in two simple steps. First, it purifies water with a proprietary distillation-based method. After the purification, the water is enhanced through a unique, patent pending mineralisation process, where purified water flows through a cartridge which contains several layers of mineral ingredients.

By putting humans first, Mitte aims to change how water is consumed.

The role

We are looking for a leader and experienced manager who will bring the product to the next level. As the Head of Water and Physiology, your most immediate goal will be to drive innovation in purification, sanitation and mineralization technology.

Main responsibilities

Lead the water science team as part of our larger technology department. You will work directly with our CTO.

- Refine existing and define new water mineralization methods, as well as sanitation and prevention of chemical leaching.
- Define methods to verify mitte purification technology against competitive alternatives, and implement action plans critical for taking the product to market.
- Drive cooperation with other internal and external stakeholders, which includes (but not limited to): business, marketing, innovation, industry experts.
- Develop the research program to understand the link between a healthy body and water.
- Establish the Scientific Advisory Board and research partnerships with relevant institutions.

Requirements

Strong background in chemistry, graduate of water science, mineralogy, medicine, pharmacology, food science or a related degree.

- Several years of professional experience in research & development in the food and/or beverage industry, medicine, pharma, biotech or related fields.
- Proven track record leading complex technical projects and teams.
- Full English proficiency (speaking, reading & writing).
- A strong team player able to work in a dynamic, international environment with different disciplines (hardware, software, business, marketing, etc).

Pluses

- German language skills (speaking, reading & writing).

What we offer

- Flexible hours
- 28 vacation days
- Modern office in central Berlin
- Competitive salary
